

.....
Follow the **brief** installation and connection instructions
.....

Guests attend (briefly):

Requirements:

- Latest [Java](#) version installed, uninstall any older version
- Virtual room attendance information. Will be sent from the event arrangers
- Mozilla Firefox [52 ESR \(or higher\)](#) 32-bit release , Internet Explorer or Safari or Google Chrome (with [Connector](#))

Attend via invitation:

1. Use the “Guest Attend URL” to navigate to event attendance page
2. Select Greek/English language from the selector at the top of the page
3. Follow the appearing wizard:
 - i. Add your email at “Email Address” field
 - ii. Add the event password at “Event Password” field
 - iii. Choose “Launch on Desktop”
 - iv. Use your particulars to fill in the fields “First Name”, “Last Name”, “Display Name”
 - v. Choose “Launch on Desktop”

The first time you choose that option you will be redirected to download and install Saba Meeting App, according your Operating System (auto recognized if your Operating System is compatible). You need to install the App executing the file. After that, Saba Meeting App will be executed automatically every time you attend an event.

Make sure you allow the Java plugin to execute in your browser each time you will be asked to.

Mozilla Firefox users have to user either version 51 (or lower) that supports Java plugin, or version [52 ESR \(or higher\) 32-bit release](#).

Google Chrome users need to install the [Saba Meeting Connector extension](#) that will be prompted during the first connection.

Microsoft Edge is not supported.
