

.....
Follow the **brief** installation and connection instructions
.....

Guests attend (briefly):

Requirements:

- Latest [Java](#) version installed, uninstall any older version
- Virtual room attendance information. Will be sent from the event arrangers
- Mozilla Firefox [52 ESR \(or higher\)](#) 32-bit release, Internet Explorer or Safari with activated Java plugin (the way of activation and execute permissions depends on browser options)

Attend via invitation:

1. Follow the “Guest Attend URL”
2. Follow the appearing wizard:
 - i. Add your email at “Email Address” field
 - ii. Add the event password at “Event Password” field
 - iii. Choose “Attend in Browser”
 - iv. Use your particulars to fill in the fields “First Name”, “Last Name”, “Display Name”
 - v. Choose “Attend in Browser”

While Java is being executed look out for messages or icons to enable/give permissions to the plugin (the way depends on the browser)

Google Chrome and Microsoft Edge are not supported as long as they do not support Java.

IF you have trouble with Java or the above way of attendance, you may also use the Saba Meeting App:

- i. Follow the steps above in order to attend
- ii. While Java is being loaded a link will appear at the bottom of the window, “Having problems? [Install the Saba Meeting App](#) to join the session.” which you can follow
- iii. Do the installation and repeat the attendance procedure

For further instructions refer to “[Guest Attend with Saba Meeting App \(recommended\)](#)”
